Using Common Module Settings (Groups)

Using Common Module Settings

AMVONET

Common Module Settings are used when assigning a “Resource” or “Activity” to a specific group only to access.

1. At the end of the settings input for both a “Resource” and “Activity”, you will see the “Common Module Settings” block.

Group mode Separate groups

Grouping* None

Available for group members only*

Grade category Uncategorised

[* Hide Advanced](#)

2. Decide on the “Group Mode”. There will be three different options for the group mode:
 - a. No Groups = This Resource or Activity will NOT be assigned to a specific group, and all participants in the course can access / contribute to the item.
 - b. Separate Groups = This Resource or Activity will be assigned to a specific group, and ONLY THAT GROUP can access / contribute to the item. Items assigned to other groups are not visible.
 - c. Visible Groups = This Resource or Activity is visible / accessible to ALL participants in the course, however, only member of the assigned group can CONTRIBUTE to the item.

Please note: This setting may be a default setting that is adjusted in the “Course Settings”, under “Group”
