

Folder Structure

Author:
amvonet

Created On: 08 Apr 2011 3:38 PM

The folder structure within AMVONET will have three main subsets:

1. **Share Files** â€“ This folder will convey the file structure found within AMVONET Connect and AMVONET Publish. Files uploaded in one area can be accessed in the other two areas.
2. **Types** â€“ This folder will contain the different types of files used during the specific recording you are accessing.
3. **Session** â€“ This will give a listing of the different recordings that were created within the AMVONET Connect Live Session
